JOURNAL OF IMMUNOLOGICAL METHODS

Contents of volume 198 (1996)

Number 1 – 30 October 1996

Research reports

Quantitation of eosinophil and neutrophil infiltration into rat lung by specific assays for eosinophil peroxidase and myeloperoxidase. Application in a Brown Norway rat model of allergic pulmonary inflammation
T. Schneider and A.C. Issekutz (Canada) 1

Effect of isolation protocol on eosinophil function: Percoll gradients versus immunomagnetic beads
J.B. Sedgwick, Y. Shikama, M. Nagata, K. Brener and W.W. Busse (USA) 15

Multi-well ELISA based on independent peptide antigens for antibody capture. Application to Lyme disease serodiagnosis
Z. Yu, J.M. Carter, L.H. Sigal and S. Stein (USA) 25

Characterization of peptide diffusion into electropermeabilized neutrophils
F.R. DeLeo, M.A. Jutila and M.T. Quinn (USA) 35

Selection of binders from phage displayed antibody libraries using the BIAcore™ biosensor
A.-C. Malmborg, M. Dueñas, M. Ohlin, E. Söderlind and C.A.K. Borrebaeck (Sweden) 51

Generation of mutant cells with constitutively active β_2-integrin LFA-1
H. Hedman and E. Lundgren (Sweden) 59

Chicken anti-protein A prevents *Staphylococcus aureus* protein A from binding to human and rabbit IgG in immunoassays and eliminates most false positive results
W.L. Hoffman, A.O. Ruggles and D. Tabarya (USA) 67

Enzyme immunometric assay of thyroliberin (TRH)
E. Etienne, C. Créminon, J. Grassi, D. Grouselle, J. Roland and P. Pradelles (France) 79

Comparative analysis of flow cytometric methods for apoptosis quantitation in murine thymocytes and human peripheral lymphocytes from controls and HIV-infected persons. Evidence for interference by granulocytes and erythrocytes
H. Lecoeur and M.-L. Gougeon (France) 87

Generation of soluble recombinant human acute phase serum amyloid A2 (A-SAA2) protein and its use in development of a A-SAA specific ELISA
C.C. McCormack, A.H. Hobson, S. Doyle, J. Jackson, C. Kilty and A.S. Whitehead (Ireland) 101

Notes to authors 111

Number 2 – 13 November 1996

Research reports

Particle concentration fluorescence as an alternative to radioactivity for cytokine receptor binding assays
E. Sarubbi (Italy) 113

Estimation of antigen-responsive T cell frequencies in PBMC from human subjects
K. Broman, T. Speed and M. Tigges (USA) 119

In vitro investigation of factors influencing IgE synthesis
S. Haba and A. Nisonoff (USA) 133

Application of immunoprinting for assessment of fibroblast secretory heterogeneity
A.I. Dongari-Bagtzoglou and J.L. Ebersole (USA) 145

Characterization of two ELISAs for NGAL, a newly described lipocalin in human neutrophils
L. Kjeldsen, C. Koch, K. Arnljots and N. Borregaard (Denmark) 155

An evaluation of the accuracy of four ELISA methods for measuring natural and recombinant human interferon-γ
B.D. Paasch, B.R. Reed, R. Keck, B.K. Sandlund, E. Gilkerson and R. Shalaby (USA) 165

Herpes virus saimiri transformation of T cells in CD3γ immunodeficiency: phenotypic and functional characterization
C. Rodríguez-Gallego, A. Corell, A. Pacheco, M. Timón, J.R. Regueiro, L.M. Allende, A. Madroño and A. Arnaiz-Villena (Spain) 177
Mapping of epitopes recognized by PM/Scl autoantibodies with gene-fragment phage display libraries
M. Blüthner, E.K.F. Bautz and F.A. Bautz (Germany) 187
A simple and rapid method for removal of specific cell populations from whole blood
R.K. Zwerner, R.J. Schmittling and T.R. Russell (USA) 199
A nitric oxide production bioassay for interferon-γ
Y.-M. Kim and K. Son (USA) 203

Contents of volume 198 (1996) 211

Notes to authors 213
